GYPSUM WORK

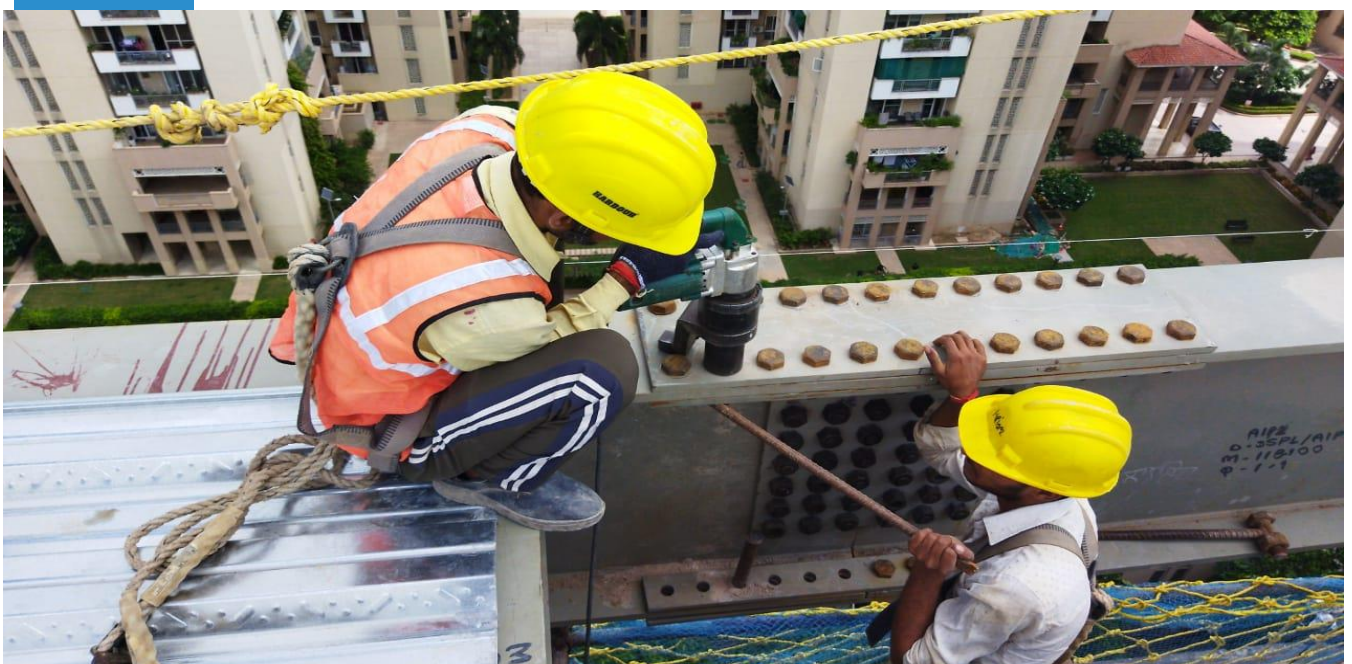

Structure Work

We are one of the renowned names engaged in offering right solutions to our clients in the field of Industrial Structure Erection Service. The offered service is rendered by our skilled professionals & technicians, who possess immense experience in the domain. With a commitment to maintain the highest safety standards, our highly skilled staff and welders produce top-quality structural fabrication and design work.

FABRICATION & ERECTION OF PEB

BOLT TORQUING SERVICES

Deck sheet fixing Work

Decking sheets are flat surfaces or platforms capable of supporting floor and ceiling sheets and are attached to the exterior or interior of a building structure. These sheets are very helpful in reducing the concentrated loading effect of the roof on building structures by proper distribution of load

DECK SHEET FIXING WORK

Shear stud welding Work

Stud welding refers to the joining of circular-shaped parts (studs) with flat work pieces by means of a welding arc and the application of a pressing force. The zones are joined in the liquid state of the welding zone. No filler material is used

SHEAR STUD WELDING WORK

Steel Work

Stainless Steel Railings such as Stainless Steel Modern Railing, Stainless Steel Hand Railings and Stainless Steel Capsile Railings which have dimensional accuracy and excellent attributes. Combined using the best known features, these stainless steel railings are constructed making use of the high grade steel which is procured from our most trusted vendors

Clean Room

The goal of clean rooms is to provide a space in which users can build critical components and test products for performance, durability, etc. without having to worry about contamination. Clean rooms also allow users to simulate the environment or environments in which an item will be used. Aerospace engineers, for example, can have a clean room built that simulates the air pressure, temperatures, gravity levels, etc. that will be present in the environment an aircraft or spacecraft will operate. Inside this control environment, testing is much more efficient and results are much more accurate.

Clean rooms are essential to applications that rely on pristine air quality and particle elimination. These applications include: optics, aerospace, medical device, biotechnology, software engineering, pharmacological studies, infectious disease testing, and various medical research operations and products testing.

DESIGN & ERECTION OF CLEAN ROOM

ALL TYPE INSULATED PANELS

Road Work

We are engaged in providing a wide range of RCC Road Contractors Services services to our prestigious clients. Our wide range of services includes commercial building service and civil construction works. Water proofing Work

Waterproofing is one of the behind-the-scenes stuff that benefits everybody, from babies to the elderly. Reports have shown that waterproofing only accounts for 1% of a building's construction costs but when ignored, it can be responsible for almost 90% of the damage. Waterproofing system provides protection to the structure from water ingress. The practice of waterproofing dates back to ages where the different techniques used were bituminous, metallic sheet, polyurethane based and so on.

Maintenance

Is your workplace in need of a little TLC? Worry not! We can provide a regular and flexible office maintenance service on a frequency to suit you.

It can be a challenge to keep your office maintained. Regular office maintenance can be difficult and costly, long gone are the days of an on-site 'handyman'. It can be very difficult to find a solution to tackle small issues without paying a huge call out premium.

However, we have solution. At Khattu we take a different approach to office maintenance. We work with facilities and office managers, from large corporations to small businesses, schools and sports clubs. We provide a range of 'handyman services' that help keep your work environment running smoothly, and better still; we do this to suit both your needs and your budget
